

April 2021 update

...hope in this life and the life to come...

Your kindness has touched our staff and they would like to share a few words with you this month to express their gratitude. We hope you hear their hearts of thanks as they share stories of your impact from their perspectives.

Thank you for the donations you send to the Haitian people and especially to the population of Cazale.

Thank you because you are faithful in helping us. Every time you give you save a life. You help those suffering with an illness find healing. You help malnourished kids overcome malnutrition. You help those who are abandoned and without support be rescued. You help those who are miserable find help for their physical body and their soul too. You help those who don't know God find Him and listen to His Word. You help the poor find access to health.

I'll give you a little story that touched me and showed me how your help saved the life of a child. There was a child who came to the clinic. He was swollen in every part of his body. His oxygen was low and he was malnourished. We did some lab tests for him and the results revealed his very low hemoglobin was only 3g/L.

The donations you sent helped him to get oxygen, go to a hospital to get a blood transfusion, and come out of the malnourished state he was in. Now, this boy is living in good health with a happy heart. This makes our hearts happy. This makes his parent's hearts happy. This makes God's heart happy too.

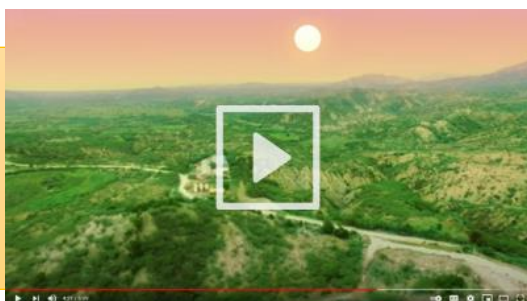

Your donations save lives! Thank you for your support. May God bless you and your families.

-Wedgaline, lab tech

Hello and a word of thanks to you,

I'm part of the staff of RHFH which means I am witness to the many good ways you help the organization function and work. To be honest, I don't really have enough words to express my gratitude to you for the number of people you help with health, materials, and many other issues. Since I work in the branch of Christian education, I am thankful to God for the many people who have come to accept Christ in their lives. Then, we thank you for sending what you can give to help people and create jobs for us. We thank you again and pray God blesses you more every day as you help the kingdom of God grow.

-Mathurin, chaplain

**FAMILIES
ENCOURAGED**

Today, we want to take some time to explain to you the importance of the mission in our community.

Ever since we met the Zachary family, they have changed our lives in every way. Working here has helped us to build a house or room, pay for our child's school, and helped our family, friends, and surroundings. They influence the lives of the children in our area, children whose parents love them but don't have the resources to care for them well.

Let us tell you a short story to explain. There is a child named Madlene. When she came to the clinic, her whole body had peeling skin and she was malnourished. Her parents lost hope for her, but the mission took her into consideration. They took her and admitted her. After she recovered, her parents cried so much because they were happy. We who took care of her were also very happy. Her parents commended us and this gives us encouragement to continue this hard work to help kids. We feel proud to see Madlene now as a young woman.

This mission loves people very much. They do not like to see people suffering. They are ready to help anyone in any way they can and this encourages us to help others live. We have no words to thank this mission for the hard work it is doing in Haiti. It was God who made this special choice for our community's good. We will pray for RHFH and for all of you who support the mission for God to increase in your lives and fill you with His blessing so you can always encourage and help others.

-Launa, Mamoune, Rose Marie, nannies in the ICU

I'm happy to talk to you today. I work at RHFH and am happy to share with you the good things that happen when you support this mission.

Thank you for your support which gives the possibility to help children who are malnourished. I bend down very low before you for all of the efforts you make to help this mission called Real Hope because it provides services that take the tears out of the eyes of the parents who see their children suffering. They come with their child very sick and after treatment we see the parents happy.

I multiply my thanks for the financial help you give to Real Hope For Haiti to help those who have tuberculosis (TB). Because they find help for transport to get tested, they get good treatment, and they are alive. An example is a lady named Solange. She had been ill for several months. She spent lots of money on vodou treatments which didn't help her. She came to the RHFH clinic for care and now she is healed. She is alive! We are very happy for this.

"Thank You" is not enough to say everything that is in my heart. May God bless you more and more to find opportunities to help those in need.

-Carol, nurse

**SICK
HEALED**

**CHILDREN
LOVED**

It's a pleasure for me to write you this note to thank you. Carla is a child whom we love so much. She always wants to make everyone happy at home. She is fun and interesting. Since Carla came into our family, she has been a joy.

Our finances are more favorable so we can make a little savings each month. We built a two room house for our family and now we are able to add a room onto it. This is really good for our whole family. We are also very thankful to all those who support these hope children and allowing the whole family to live better together. Thank you for your support to help these children.

-Miralaine and Pascal, hope parents
