

REAL HOPE FOR HAITI

April
2023

MISSION: TO DELIVER HOPE FOR THIS LIFE AND THE LIFE TO COME THROUGH COMPASSIONATE MEDICAL CARE, QUALITY HEALTH EDUCATION, INTENSIVE MALNUTRITION INTERVENTIONS, ACTIVE COMMUNITY DEVELOPMENT, AND GOSPEL FOCUSED OUTREACH, ALL IN THE LOVE AND NAME OF JESUS.

Tity came to our clinic severely malnourished, anemic, and in need of a blood transfusion at another hospital. He returned to our center to receive inpatient care for malnutrition. He recovered in 5 weeks!

From his family: "Thanks for helping my family during this difficult time. I am very happy that Tity is alive. He was so close to death. He is now running and happy. I do not have enough words to tell you thank you."

D.M. is a 62 year old lady who suffered with dehydration and suspected cholera. She arrived to the cholera treatment center (CTC) unconscious, but regained her health and strength with medications, 10 liters of oral rehydration solution, and 7 liters of IV fluid. THANK YOU for your help and support during the cholera outbreak!

N. J. lives in a home with her mother. She began showing signs of kwashiorkor about 2 weeks before she came to the clinic. She also had fever and a cold. She began treatment with the F-75 therapeutic milk and then, when she was stable, she began eating her daily doses of medika mamba. When she first arrived, she was in pain and slept most of the time. Once she began to recover, she enjoyed playing with dolls and legos. Her mom says, "I wanted to thank you for everything. I am happy that my daughter is healed and so beautiful now. I pray that God continues to help you in everything that you do."

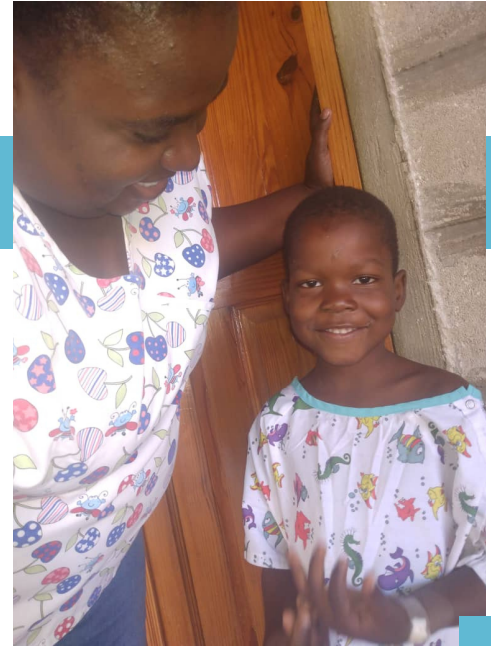

Christella came to the clinic with severe wounds and stayed for a few months to receive antibiotic shots and daily dressing changes, as well as being added to the medika mamba program. The program helped with her healing, and her mother expressed gratitude towards the clinic for their help and prayed for its continued success.

VISION: Physically, relationally, and spiritually healthy people contributing to thriving families and strong communities as God designed and desires.

From nurse Sabine, who worked at the Cholera Treatment Center (CTC):

"It is with much joy in my heart to thank you for the way you helped up start up the CTC again so we could accomplish this good work in the moment of the cholera spike. I'm writing this note to tell you thank you for your support and the help you gave us so that this would be possible. This truly helps the community and makes us succeed with a positive result. We are still sticking together every day. I love you! Thank you very much!"

Cholera hit our area on October 23, 2022 and you all were very gracious to lend a hand to care for those who were ill, provide aid to families, and promote health education. Today, with the grace of God and your partnership, cholera has decreased enough in our area that the CTC can be closed down until there is another need. Words fall short of expressing our deep gratitude for your generosity and love shown during this time. Cholera hits hard and fast, killing up to 50% of those without medical treatment. You made sure this didn't happen. In the 168 days we were open, 1330 people were treated and made a full recovery. We will always be ready for another spike, but for now cholera has decreased and we are closing the center today, April 9th. Celebrate life and hope with us on this beautiful EASTER day! Jesus is the REAL HOPE for us all - no matter how sick, how broken, how far away. He is risen and alive!

I wanted to say thank you to the clinic. Last year I was very sick and could not even walk without help. When I came to the clinic they gave me medications but also a food box each month. This helped me to be able to eat. I also took my medications each day. By the Grace of God I can say today that I am well.
