

REAL HOPE FOR HAITI

February
2024

MISSION: TO DELIVER HOPE FOR THIS LIFE AND THE LIFE TO COME THROUGH COMPASSIONATE MEDICAL CARE, QUALITY HEALTH EDUCATION, INTENSIVE MALNUTRITION INTERVENTIONS, ACTIVE COMMUNITY DEVELOPMENT, AND GOSPEL FOCUSED OUTREACH, ALL IN THE LOVE AND NAME OF JESUS.

Rosenet, battling malnutrition, arrived at our clinic with edema and a high fever. Rosenet's turnaround has been heartwarming. With dedicated care and proper nutrition, he gained 6 pounds and is on the road to recovery. His story highlights the incredible strength of the human spirit and the transformative power of compassionate care. We're inspired by Rosenet's journey and committed to supporting more children on their path to health.

Woodensky overcame a severe case of suspected cholera. Arriving at the CTC unconscious and severely dehydrated, our medical team's quick response with IV fluids and medications saved his life.

Woodensky's mom is deeply thankful for the care and support provided, which brought her son back to health. She wants to express her gratitude to everyone involved in our center. Your support turns critical moments into stories of hope and recovery, just like Woodensky's.

Thanks to your donations, we were able to refer P.D. for the surgery he urgently needed and provide the financial support to cover the operation costs. Because of you, he's on the path to recovery, ready to embrace life's daily tasks and care for his family once more. Your support makes a tangible difference in the lives of individuals and families facing difficult times.

Five-year-old Guerlande was admitted to the CTC with symptoms of severe dehydration and unconsciousness due to diarrhea and vomiting, raising suspicions of cholera. Thanks to the nurses' diligent care and effective medication, Guerlande healed quickly and was asking to return to school. Her father is deeply grateful for the free medical services and extends his prayers for the health and well-being of RHFH supporters.

VISION: Physically, relationally, and spiritually healthy people contributing to thriving families and strong communities as God designed and desires.

Claudia, a 17-month-old girl, arrived at a clinic severely malnourished, cared for by her devoted grandmother who traveled for hours to get her the help she needed. The family, who are farmers, work hard to grow corn, beans, and peppers, but still struggle to make ends meet. They live in a simple four-room house with a tin roof, along with seven other family members. Their life is challenging, especially when it comes to accessing healthcare.

Despite her critical condition upon arrival and admission to the rescue center, her treatment of special milk and nutrient-rich foods started to show positive results. Claudia gained 5 pounds, a hopeful sign of recovery, thanks to her grandmother's love and the dedicated care she received.

Since we lost my sister-in-law on January 9, 2024, and my brother became incapacitated from a work accident, I've taken on the role of caregiver for my four nieces and nephews. My brother's injury, caused by a falling bucket of cement and his subsequent inability to work, thrust me into a situation I never expected. My wife, feeling no maternal bond with B.G., the youngest at 6 months, left me to care for her while managing the farm. I devised a way to keep B.G. close in the fields, creating a cradle in a basin for her to rest, ensuring she was tended to alongside my agricultural duties.

The support from RHFH, especially formula, has been so good. It's not just about the nutrition; it symbolizes the kindness and support from others, which has been critical in keeping my family afloat during these tough times. I'm deeply thankful for this generosity as it has significantly impacted B.G.'s well-being. This assistance is a reminder of the good still in the world. Thank you!

Ferlandes is a brave 5-year-old boy who arrived at CTC in a critical condition. Suffering from severe diarrhea and vomiting, Ferlandes was extremely dehydrated, his skin pale and dry, and his eyes deeply sunken, showing he couldn't drink anything. Thanks to the immediate care he received, Ferlandes made a remarkable recovery. He's now back to his playful self, full of energy and strength.
