

REAL HOPE FOR HAITI

November
2024

MISSION: TO DELIVER HOPE FOR THIS LIFE AND THE LIFE TO COME THROUGH COMPASSIONATE MEDICAL CARE, QUALITY HEALTH EDUCATION, INTENSIVE MALNUTRITION INTERVENTIONS, ACTIVE COMMUNITY DEVELOPMENT, AND GOSPEL FOCUSED OUTREACH, ALL IN THE LOVE AND NAME OF JESUS.

Real Hope for Haiti celebrates 30 years of compassionate care in Haiti, providing medical and spiritual support to over 180,000 patients. From malnutrition treatment to health education to foster care, we meet critical needs while sharing the love of Christ. This journey has been made possible by the generous support of people like you. As we mark this milestone, we invite you to join us in continuing to bring hope and healing to those in need. THANK YOU for your partnership and support!!

Manilia, a 73-year-old food vendor, travels by motorcycle to Cabaret to buy supplies. One day, while on a moto-taxi, she was in a serious accident, injuring the back of her right foot.

At the clinic, we provided wound care, stitches, and infection-prevention injections. For two months, Manilia came daily for bandage changes until fully healed.

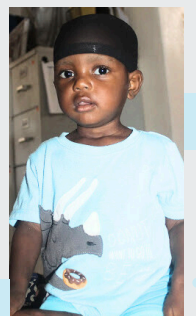

Thanks to donations from Matter, we had the bandages and supplies to help her. Your support truly impacts lives here in Haiti.

We're thrilled to share Wolens' story, a one-year-old boy from Cabaret. His mother brought him to our clinic when he was severely malnourished, weighing just 14 pounds 9 ounces. After receiving medication and joining our Medika Mamba program, he gained strength and reached a healthy 17 pounds 13 ounces in just three months. Thanks to your generosity, children like Wolens can recover and thrive. Your support makes life-saving care possible. Thank you for making a difference!

My 16-month-old son Widjay was suffering from severe malnutrition. He couldn't keep any food down, and his health was rapidly declining. Desperate for help, I brought him to the clinic in Cazale, where he was admitted to the Medika Mamba program. Week by week, I saw him grow stronger. Today, Widjay is healthy and thriving. Thank you to the donors whose generosity saved my son's life. Your support means everything to our family.

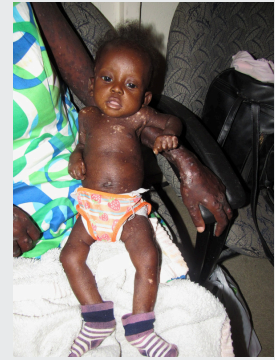

VISION: Physically, relationally, and spiritually healthy people contributing to thriving families and strong communities as God designed and desires.

My name is Emanise, and I am the mother of 8-month-old Djoudnaelle. A few months ago, we were both seriously ill, with sores covering our bodies. Djoudnaelle was severely malnourished, weighing only 8 pounds. Neighbors said we had lost hope for life, but a kind friend took me to the clinic, changing everything.

At the clinic, Djoudnaelle received medication for her skin, along with soap and ointment, and was enrolled in a program for malnutrition. I also received treatment for my skin. By our next appointment, our skin had healed, and Djoudnaelle's weight had increased to 10 pounds. By the second visit, she weighed 12 pounds and was no longer malnourished.

I'm deeply grateful for the care and support we received. Without it, I don't know what would have happened. Thank you for saving us.

Hello! My name is Mirlène, and I am 8 years old. I want to share my story with you. Some time ago, I was very sick. I had diarrhea, rashes on my skin, a fever, and didn't want to eat. Because of this, I lost a lot of weight and felt very weak.

Thankfully, I went to the clinic, and a kind nurse admitted me to the Medika Mamba program. Slowly, my health improved—my diarrhea stopped, my rashes disappeared, and my appetite returned. Today, I am healthy! Thank you to the nurse and donors who made this possible. You changed my life!

As the nurse in charge of malnourished children at the clinic, I want to express our deep gratitude for your support. I'd like to share Elena's story, a 7-month-old girl admitted to the Medika Mamba PNS program. She arrived severely malnourished, weighing only 11.7 pounds, suffering from diarrhea and vomiting. Thanks to your donations, we provided Medika Mamba, medications, and education. Elena's weight increased to 15.2 pounds, and she no longer shows signs of malnutrition. Thank you for making this possible!
