

# Real Hope For Haiti

Hope in this life  
and the life to come

Padjy-Idens

Rescue  
Center

During the fourth quarter, the Rescue Center cared for 51 patients, including 28 new admissions, 24 successful discharges, and 3 deaths. Each case reminds us of the challenges these children face and the critical role we play in their recovery. We were able to paint both main rooms, beds, and feeding tables. We welcomed a new assistant, who completed her training, and hosted a student nurse that was on break from her school.

Clinic

A total of 5701 patients were given care, including 2128 children under 14 years old. Birthing supplies were provided for 73 babies. Wound care nurses changed 2470 dressings, cared for 183 emergencies, and sutured 72 lacerations. Health topics for group education focused on saving money, freedom in forgiveness, and erosion treatment. There were 3499 lab tests done for 1023 patients.

Home

Hope  
Home

Over the past quarter, we conducted 26 home visits to ensure the children in our program are receiving the care and support they need. We also completed all the 3-ring binders for each child with all their information. This fall, those children eligible to attend school began their studies, bringing excitement and joy to everyone involved.

Prayers Up!

Restoration of health - Provision for struggling families - Peace amidst turmoil - Wisdom and direction in decision making - Protection for staff, children, and families - Receptive hearts to embrace the Gospel and receive Christ as Savior
