

REAL HOPE FOR HAITI

April
2025

MISSION: TO DELIVER HOPE FOR THIS LIFE AND THE LIFE TO COME THROUGH COMPASSIONATE MEDICAL CARE, QUALITY HEALTH EDUCATION, INTENSIVE MALNUTRITION INTERVENTIONS, ACTIVE COMMUNITY DEVELOPMENT, AND GOSPEL FOCUSED OUTREACH, ALL IN THE LOVE AND NAME OF JESUS.

Living in a one-room home of tin walls and sticks, this young boy's family struggles daily. His father farms bananas and sweet potatoes, while his mother resells drinks. Severely malnourished with kwashiorkor, he arrived weak, requiring F-75 milk, Medika Mamba, and an NG tube. Gedson, weighed 16 pounds with swollen feet and diarrhea. After treatment and daily care, Gedson's health improved, reaching 22 pounds in two months. His mother shared, "Thank you for treating him like your own." Your support makes this possible!

I'm Tamara, a nurse at the nutrition center. Play is important in children's lives. It brings them happiness, stimulates their development, and contributes to their well-being by reducing their sadness. Providing playtime for children is essential for their growth and development. Thanks to your generosity, the children can grow while having fun.

Dear friends, please join us in prayer for our supply runs. We ask for safe travel along all roads, that our trucks face no breakdowns, and that communication remains strong throughout the journeys. We pray for wisdom to make quick decisions, peace, and God's protection over every mile. May we network with kind souls, encounter open doors, and deliver supplies safely to serve our patients. Blessings for all who travel for us—your prayers make a difference. Thank you for supporting our mission and keeping us in your hearts.

My name is Tibebe, and I work at the nutrition center. The children eagerly look forward to playtime with the toys you have donated. Play not only brings them joy, but also helps them learn and develop important skills. It's wonderful to see their faces light up as they explore and engage with each toy. Thank you for your generosity. Your gifts truly make a difference in their lives.

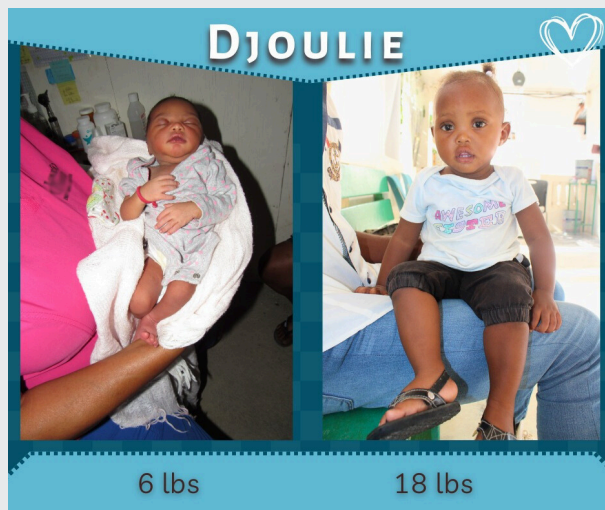

VISION: Physically, relationally, and spiritually healthy people contributing to thriving families and strong communities as God designed and desires.

Djoulie's journey is a powerful testament to your generosity. Tragically, she lost her mother just one day after birth. The very next day, her loving family brought her to our clinic, and our dedicated team sprang into action.

We provided Djoulie with essential supplies—infant formula, baby bottles, and vital guidance on proper infant care—to ensure she had the best possible start.

With monthly follow-ups to monitor her progress, Djoulie, who weighed 6 pounds at two days old, now weighs 18 pounds and is thriving. Your kind donations have given her the nutrition and care she desperately needed. We are deeply grateful for your continued support that transforms lives like Djoulie's every day.

Mizius, 66, has been a long-time clinic patient managing hypertension. He visits regularly for medication and guidance on maintaining his health. When he could no longer work, we began providing him with a monthly food box in 2019. This support, along with his medication, helps him feel better. He is deeply grateful. Thank you, dear donors! Your generosity allows us to assist many people with food. We appreciate you more than words can express!

My name is Dieulamene, and I work at the nutrition center. I love caring for and playing with children. Play is essential for their growth—it brings joy, teaches sharing and cooperation, and nurtures their intellect. Toys are especially powerful; a simple toy can transform a crying child's day into one filled with happiness. Every toy you donate is more than an object—it's a gift that sparks joy and supports their development. Thanks to your generosity, we can offer these children moments of comfort, discovery, and delight. Thank you for helping them flourish through play.
