

REAL HOPE FOR HAITI

July
2025

MISSION: TO DELIVER HOPE FOR THIS LIFE AND THE LIFE TO COME THROUGH COMPASSIONATE MEDICAL CARE, QUALITY HEALTH EDUCATION, INTENSIVE MALNUTRITION INTERVENTIONS, ACTIVE COMMUNITY DEVELOPMENT, AND GOSPEL FOCUSED OUTREACH, ALL IN THE LOVE AND NAME OF JESUS.

My name is Johana, I'm 31 and live in Cazale. I came to the clinic with abdominal pain and loss of appetite. After my consultation, the nurse sent me to the lab for tests, where I discovered I was pregnant and anemic. Thanks to the functioning laboratory—made possible by generous donors—I received vitamins, iron, and guidance for a healthy pregnancy. I'm grateful for the care I received and feel healthy and ready to be a mom. Thank you from the bottom of my heart!

Two-year-old G.P. trekked four hours by foot to our clinic, where he received medication and joined the Medika Mamba feeding program. Month after month, he regained his appetite and strength. Thanks to this program and generous donors, G.P. is now healthy. His mother sends heartfelt gratitude and blessings.

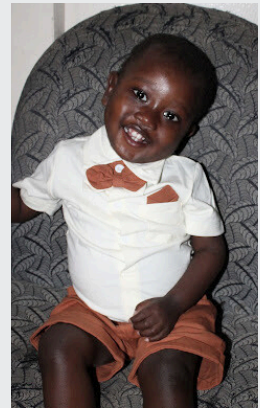

Murat, a 42-year-old tailor living 20 minutes from the clinic, came in with concerning symptoms. A blood sugar test revealed diabetes, and a creatinine test helped guide his treatment. He received medication and education on managing his condition at home. Thanks to our well-equipped lab—and the donors who make it possible—we can quickly diagnose and treat patients like Murat. We're truly grateful for your support in providing lifesaving care.

Fadaelle, a six-month-old baby girl, was brought to our clinic by her aunts after her weight dropped dangerously—she weighed only 4 pounds. Her family couldn't afford formula after her mother left. We provided Nestogeno and taught her caregivers how to support her growth. Now, Fadaelle weighs 14 pounds 12 ounces, sleeps peacefully, and is thriving. Her family is deeply grateful. Thank you for helping give her the healthy start every child deserves.

VISION: Physically, relationally, and spiritually healthy people contributing to thriving families and strong communities as God designed and desires.

Suffering from severe malnutrition with grade 3+ edema and a dangerously low weight of only 16 pounds, Gemsley, a 17-month-old boy, was admitted to the center. His mother had passed away four months earlier. Since then, he had been living with his aunt. Upon admission, medications and therapeutic milk to begin his nutritional recovery. Day by day, we made sure to meet all of his needs: appropriate feeding, daily hygiene, playtime, medical monitoring, and above all, constant care and attention. Gradually, Gemsley began to regain his strength. His appetite returned, and he started gaining weight. Thanks to the care provided at the nutrition center, his health improved significantly. He reached a normal weight of 23 pounds, the swelling disappeared, and he was able to return home to his aunt. Today, his aunt expresses her heartfelt gratitude. She is overjoyed to see her nephew in such good health and wishes to warmly thank all the donors. It is thanks to your generosity that Gemsley was able to receive quality care and recover his health. A sincere and heartfelt thank you to each and every one of you.

Pedriano, a 4-year-old boy, lives with his parents and grandmother in Cameau, 30 minutes from the clinic. Upon arrival, he had a fever and was underweight. He was admitted to the Medika Mamba program. His parents received advice on proper nutrition and use of the Medika Mamba. Thanks to treatment and follow-up, Pedriano has gained weight, regained his appetite, and his health has improved. His grateful mother told us that without this program, her son would not have recovered so quickly. She warmly thanks the team for the care he received and hopes other children can benefit from the same support.

Luciana, a 24-year-old mother living 30 minutes from our clinic in Béthel, came in with nausea, headaches, and abdominal pain. Lab tests revealed she's expecting her second child. Our nurse provided guidance and free prenatal vitamins to boost her appetite, improve sleep, and support her baby's healthy development. Luciana was overjoyed by the care and now visits the clinic monthly for pregnancy check-ups. She thanks everyone for their kindness and support.
