

REAL HOPE FOR HAITI

May
2026

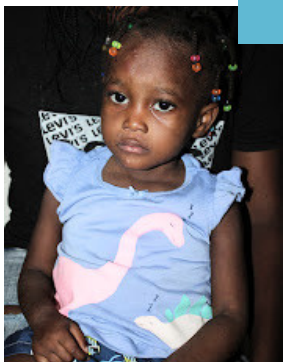

MISSION: TO DELIVER HOPE FOR THIS LIFE AND THE LIFE TO COME THROUGH COMPASSIONATE MEDICAL CARE, QUALITY HEALTH EDUCATION, INTENSIVE MALNUTRITION INTERVENTIONS, ACTIVE COMMUNITY DEVELOPMENT, AND GOSPEL FOCUSED OUTREACH, ALL IN THE LOVE AND NAME OF JESUS.

Seven-year-old Clelie arrived at our clinic weak and suffering, battling severe malnutrition, fever, and abdominal pain, weighing just 39.5 pounds. After treatment, she was enrolled in our Medika Mamba nutrition program. With consistent care and daily nutritional support, her symptoms resolved and her strength slowly returned. Today, Clelie weighs 44.3 pounds and is thriving. Her mother's gratitude says it all. Thank you for making recoveries like this possible!

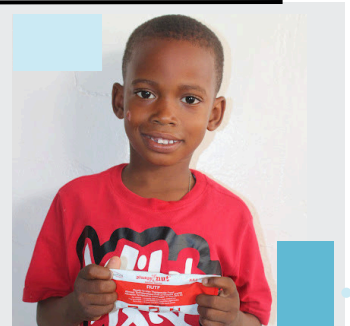

My little Winnie was so sick. She wouldn't eat, she had fever, and I watched her grow weaker every day. I didn't know what to do. When we came to the clinic, they gave her medicine and enrolled her in the Medika Mamba program. Two months later, my daughter weighs 24 pounds and is healthy again. I am so grateful!

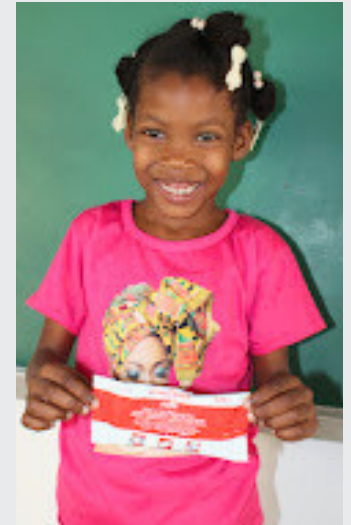

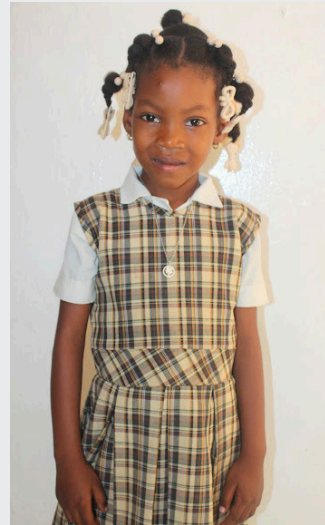

When five-month-old Donia arrived at our nutrition center, she weighed just 7 pounds and was so sick she needed oxygen support to breathe. Diagnosed with severe acute malnutrition, her little body was in a serious fight. Our team got to work right away with around-the-clock care. Over the next two months, Donia steadily grew stronger. The swelling resolved, her strength returned, and by the time she went home, she weighed a healthy 13.2 pounds. What a difference your support makes!

An hour is a long way to travel when your child is sick. But that is exactly what M.C.'s mom did, loading up her six-year-old son and making the journey to our clinic. He was underweight, feverish, and showing clear signs of malnutrition. Our team got to work, and thanks to the Medika Mamba program, M.C. began to turn a corner. Today he is healthy and back to being a little boy again. That hour-long journey had a happy ending because of your faithful generosity. Thank you!

VISION: Physically, relationally, and spiritually healthy people contributing to thriving families and strong communities as God designed and desires.

When six-year-old Islande grew weak from diarrhea, fever, and a failing appetite, her mother watched helplessly as her little girl faded before her eyes. Islande lives in Cazale with her mom and three brothers, and like so many families here, they had nowhere else to turn. When she arrived at our clinic, she weighed just 38 pounds, a clear sign that her body was struggling. After a thorough medical evaluation, our team provided treatment and enrolled her in our Medika Mamba nutrition program. Day by day, with proper care and the right nutrition, Islande's strength began to return. Her appetite came back, her energy improved, and her smile returned. By her follow-up visit, she was healthy and thriving, weighing 43 pounds. Because of your generous support, a mother did not have to face this alone. Thank you for being there when it mattered most!

Five-year-old Widmica arrived at our clinic sick and struggling, battling diarrhea, vomiting, and the painful effects of malnutrition. She weighed just 23 pounds, and the swelling in her little body was a telltale sign that she needed help fast. After a thorough medical evaluation, our team treated her symptoms and enrolled her in our Medika Mamba nutrition program. Day by day, the difference became clear. The swelling disappeared, her energy returned, and she steadily gained weight, reaching 26 pounds by her follow-up visit. Her family is overjoyed and says that Mamba truly changed their lives. Because of your generosity, little girls like Widmica get a second chance!

Loberne came to our clinic desperately ill, his body swollen, his lungs filled with fluid, and his heart weakening. After being turned away elsewhere, he finally found care in Cazale. While he was treated, our chaplains sat with him, encouraged him, and shared the Gospel. In that moment, Loberne chose to return to God. He came seeking physical healing and found so much more.
