

REAL HOPE FOR HAITI

August
2026

MISSION: TO DELIVER HOPE FOR THIS LIFE AND THE LIFE TO COME THROUGH COMPASSIONATE MEDICAL CARE, QUALITY HEALTH EDUCATION, INTENSIVE MALNUTRITION INTERVENTIONS, ACTIVE COMMUNITY DEVELOPMENT, AND GOSPEL FOCUSED OUTREACH, ALL IN THE LOVE AND NAME OF JESUS.

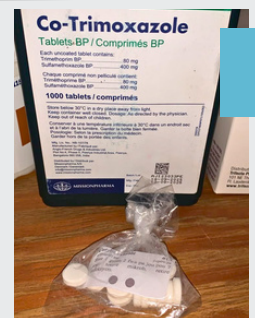

Maglène participated in our Bible study on Galatians and experienced spiritual transformation. Through the study, she gained deeper understanding of God and learned to serve Him more faithfully. She discovered the importance of forgiveness, kindness, and helping others. Most importantly, she learned that God desires not just outward obedience, but a transformed heart. Your donations fund these discipleship programs that change lives spiritually. Thank you for investing in spiritual formation and growth.

My 15-month-old daughter Love was dying. I felt helpless. The clinic gave her medicine, but they gave me something more powerful: knowledge. They taught me how to feed her properly, how to care for her at home, how to fight for her recovery. Suddenly, I had control. I understood what my daughter needed. Armed with this knowledge, I became her healer. Today, Love is thriving. Knowledge didn't just save her life. It gave me back my power as a mother.

Mrs. Maximène arrived at our clinic in critical condition with diabetes, high blood pressure, heart disease, and kidney disease. Her oxygen level had dropped dangerously low. We placed her on two oxygen devices just to keep her alive. But our care goes beyond medicine. Our chaplains visited and prayed with her. By Friday, after prayer, her oxygen saturation rose to 97%, and we removed the oxygen support. Days later, she was discharged, healed and grateful. Your donations allow medicine and faith working together to restore lives.

Nine-year-old Dieurry traveled six hours from Conoye after injuring his foot on a rock. What seemed minor became infected quickly. Our team cleaned his wound and prescribed antibiotics immediately. Because essential medications were available at our clinic, Dieurry received treatment without delay. Today, he's healing well and back to school. Thank you for supporting our mission. Your generosity ensures children like Dieurry receive timely care and return to the joys of childhood.

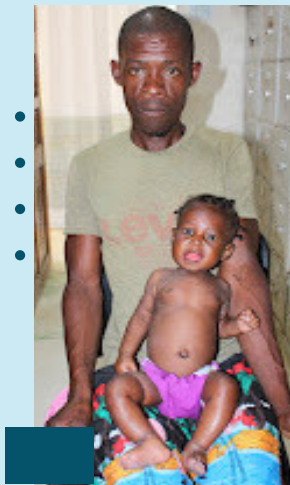

VISION: Physically, relationally, and spiritually healthy people contributing to thriving families and strong communities as God designed and desires.

Ten-year-old Loubens arrived at our nutrition center in critical condition. Severe acute malnutrition combined with significant edema had weakened his small body. He weighed only 37 pounds, dangerously low for a child his age. Our team immediately completed a full medical assessment and created an individualized treatment plan. Throughout his stay, Loubens received close medical supervision, proper nutrition, and daily care from our dedicated team. Day by day, we watched him improve. The swelling decreased. His strength returned. His weight climbed steadily.

By discharge, all signs of edema had resolved. Loubens weighed 46.5 pounds and was healthy enough to return home to his family. This recovery was made possible by generous donors who believe in comprehensive care. Thank you for transforming lives.

Seven-month-old Phanaika lost her mother at five months old. Her grieving father brought her to our clinic when she became dangerously weak. She had severe malnutrition, anemia, skin rashes, and vomiting. Our team admitted her for specialized care with infant formula, fortified porridge, and close monitoring. After two months of dedicated treatment, her transformation was remarkable. The edema disappeared. Her weight increased. Her blood improved. When her father came to take her home, tears filled his eyes. His daughter was alive and thriving. Your support made this recovery possible.

Someone arrived in Cazale searching for a better life. With no job and limited resources, they faced a year of hardship. A kind neighbor provided shelter while they struggled to survive. Then the mission offered employment. Everything changed. They built a home, improved their finances, and gained confidence. Their transformation is visible in every area of life—physically, mentally, economically, and socially. One opportunity at the right time can completely transform a future. This is what happens when communities support one another.
